TAI

SOFTWARE

TAI Software automates your reinsurance administration.

"

The poor-quality data in my reinsurance administration system is causing delays in premium payments and recovering claims. How can I solve this?

✔ We consolidate your current legacy systems into a single system, giving you one source of quality data.

✔ The TAI software automatically applies the terms and conditions of your treaties. It also validates premium and risk limits to ensure timely payment of claims and premiums plus accurate reporting.

✔ Over 90% of the top insurers in North America, by life face amount issued, trust TAI software for their life reinsurance administration.

⚙ SOFTWARE SUITE

TAI.NET

The only stand-alone life reinsurance administration system providing a turnkey, integrated solution for ceded, reinsured, and retroceded life and living benefits.
With TAI.NET you can automatically process large volumes of reinsurance new business, changes, and terminations.

TAI ANNUITY

Process Fixed, Indexed, Variable and GMIB/GMDB annuity products automatically with TAI.NET Annuity, a stand-alone life annuity administration system or an add-on to your existing TAI.NET software.

TAI INSIGHTS

Analyze your reinsurance data across multiple dimensions using TAI Insights. Easily report impact on your bottom line, track KPI's specific to your reinsurance program, view historical data trends to flag irregular activity, and create valuable reports for your organization.

TAI CONNECTOR

Extract data from TAI.NET with TAI Connector, and securely transfer it to other internal systems, teams, or departments as well as external partners. This tool allows you easy access to specific data points and sub-sets. You can accomplish all of this without having to rely on support from IT.

⚙ SERVICES

TAI Services analyzes, identifies and solves areas of reinsurance risk that are impacting your bottom line.

Outsourced Reinsurance Administration

Gain operational efficiencies and focus on core business activities using TAI's stress-free, SSAE18-certified, outsourced reinsurance administration services for ceded and assumed reinsurance operations. Eliminate the headaches associated with routine administrative commitments by utilizing our best-in-class talent and streamlined processes.

Artificial Intelligence (AI) Driven Treaty Risk Assessments

Structure your unstructured paper treaty data into a digital format, making it functional for deeper analysis while also uncovering the history, complexities, and discrepancies behind each term, field or data point through AI-driven treaty risk assessments.

End-to-End System Upgrade Integrations

Gain access to the resources and expertise required to implement comprehensive TAI system upgrades and integrations – including cleaning, prepping and testing data – to ensure accuracy for future operations.

Process and Operations Consulting

Optimize your reinsurance operations with our full-service consulting services. Our team validates existing infrastructure, processes, workflows and controls to identify any inefficiencies or potential risks. You receive a comprehensive plan that includes process enhancements and additional ways to improve current operations, with the available resources to implement the proposed plan.

> "
> My current reinsurance operations are at risk because my team relies on manual processes, historical paper treaties and some of my key team members are approaching retirement. How can I solve these?

✓ We equip you with the processes, tools and resources necessary for optimal reinsurance operations performance.

✓ We digitize your paper treaty data so that you can leverage it across your entire enterprise for business processes and more robust data analytics.

✓ Our experienced team relieves you of staffing restraints, giving you time to focus on other strategic priorities and initiatives.
