

Automatic Reinsurance - Treaty Effective Dates

This guide provides a simple overview of how to configure the effective dates when a new treaty is introduced, and the plan already exists in the AutoRe Table. This ensures reinsurance will continue to be processed correctly and automatically.

1. Add the new treaty to the system. Navigate to the Treaty Screen (Tables -> Treaty Tables -> Treaty) and select 'Add'.

Partial Treaty Screen Shot

2. Fill in all required information and Save.
3. Navigate to the AutoRe Screen (Tables -> Treaty Tables -> Automatic Reinsurance).
4. Enter at least 7 characters on the Auto Reinsurance screen if the 8th character is your date driven character and your TAI treaty has 8 characters only.
 - If your TAI treaty is more than 8 characters, you should enter all but the last character on the Auto Reinsurance screen and the system will determine the appropriate last character by the dates.
 - If you enter all characters of your treaty and the system finds a TAI treaty that matches those characters but doesn't find any TAI treaties with an additional last character to try a 'date match' on, the system will use the TAI treaty that fully matches your entry in the Auto Reinsurance table.

Co: TAI Plan: T20

| Treaty | Begin Date | End Date | Policy Max | Alpha Split From | Alpha Split To | Issue Type | Min Age | Max Age |
|-------------------------|-------------|-------------|------------|------------------|----------------|-----------------|---------|---------|
| AARTNTA | 01-Jan-2004 | 01-May-2012 | 999999999 | A | Z | All Issue Types | 0 | 99 |
| AARTNTC | 02-May-2012 | 31-Dec-2100 | 5000000 | A | Z | All Issue Types | 0 | 99 |

Policies with Plan T20 issued before or on 05/01/2012 will be ceded to the AARTNTA Treaty, while policies with Plan T20 issued on or after 05/02/2012 will be ceded to the AARTNTC Treaty.
